RE: Update on Covid Guidelines

I would like to communicate new quarantine guidelines announced this week by the CDC that we will be following immediately:

- In the event that students have been exposed to a person who has Covid (or has symptoms of Covid), students may return to school on Day 10 without symptoms.

- For your information, the CDC recommends that testing during quarantine may not occur prior to Days 5, 6, or 7. If students have a Rapid test with negative results, the students may return on Day 8.

- If parents choose not to get a Covid test within that window, the students may return to school after Day 10 of exposure without symptoms.

- If students develop symptoms during the quarantine period, they may not return to school and parents must notify the school and follow their doctor's guidelines.

These new guidelines afford the students the ability to return to school sooner than the original guidelines. I am grateful for the support and patience of our parents and staff. We still believe that students need to be in school, and that in-person, on campus education is the best for students.
